

3D Wax Mill

Complete Jewelry CAD/CAM Solution

Work from a counter sketch, or scan an existing piece using the contact scanning feature

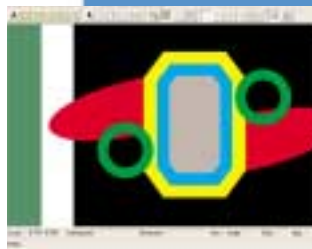

Create your design with Roland's 3D Engrave software.

Produce a precise wax model with the MDX-15 using the special spindle unit.

Finished precision wax mold for casting.

Design and create. It's that simple! The 3D Wax Mill System lets you quickly and easily produce any jewelry design you can dream up. 3D Wax Mill will also save you hundreds of hours otherwise spent hand sculpting wax models. It will even sculpt wax models at night, while you're at home with your family.

The beauty of the 3D Wax Mill system is in its simplicity. Bundled Roland 3D Engrave CAD software keeps learning simple, so you can earn profits as soon as possible. 3D Engrave lets you produce 3D reliefs, mirror models for matching earrings, and much more. Tutorials demonstrate every step in the jewelry making process, making it easy to experience immediate success.

At the heart of the 3D Wax Mill System is Roland's MDX-15. This

desktop mill automatically produces precise, castable wax models for all types of rings, pendants, bracelets and charms. The MDX-15 can also digitize a customer's ring or pendant, allowing you to make edits on the fly. Its advanced scanning technology captures even the most intricate details.

The 3D Waxmill System comes complete with a full membership to the 3D Waxmillers Club, one of the fastest growing jewelry CAD/CAM Web forums. Jewelry Designers, Custom retailers and manufacturers share ideas about everything from building their business and new design techniques to equipment and events. This tremendous resource benefits all 3D Waxmill customers.
